DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Peterson (6,735,793).

The Peterson reference discloses a water retention dam 200 (Figs. 2A- D) comprising: a collapsible outer shell 206, including an inner chamber 210 and at least one surface for preventing the passage of water, the outer shell 206 having a first surface configured to serve as a barrier to water and a second surface for attachment to a floor, the second surface having a recess 212 for receiving an adhesive 504 (as shown in Fig. 5).

Regarding claim 2, the outer shell 206 is foam (col. 4, line 1).

Regarding claim 3, the collapsible outer shell includes an air-filled chamber 210.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3751

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson (6,735,793).

The Peterson reference discloses that other the water retention dam can be made of other forms and shapes. Although Peterson is not specific that the first surface is arched-shaped, it would have been obvious to one of ordinary skill in the art at the time the invention was made modify the first surface of the Peterson dam to have an arched shape, wherein so doing would be a matter of obvious design choice.

5. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson (6,735,793) in view of Blitch (6,735,793).

Although the Peterson reference does not disclose that the adhesive is used an adhesive tape, attention is directed to the Blitch reference which teaches an adhesive tape for using to attaching a splash guard in a bathroom.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made employ an adhesive tape on the recess of the Peterson water retention dam in view of Blitch for conveniently securing the dam to a shower.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Straus et al and Torres references show water retention devices.
